Medication Therapy Management

Spend quality time with the pharmacist to answer questions about your medications and how they impact your health

Medication Therapy Management (MTM) provides an in-depth one-on-one review of all your medications (prescription, over-the-counter, vitamins and herbals) and to evaluate the safety and effectiveness of your medication therapy. **Please bring your medications with you to your appointment.**

MTM Objectives

Medications interaction and side effects

Effect of medication to blood sugar, blood pressure and cholesterol

Cost-effective options available

Taking the medications at the right time of day or in the right order

A benefit of MTM is to help you get the most from your medication: improving understanding of your medications, controlling costs, and improving health outcomes in collaboration with your Roseman Medical Group provider.
